

SCHOOL OF PURE AND APPLIED SCIENCES
COMPUTING & INFORMATION TECHNOLOGY PROJECT GUIDELINE

S/NO	CHAPTERS	SUB-SECTIONS
1	PRELIMINARY PAGES	- Title page/ Cover Page - Dedication - Acknowledgement - Abstract (half a page) Table of contents - List of figures - List of tables - Abbreviations
2	INTRODUCTION (chapter one)	- Introduction (to the chapter) - Background - Current/existing system - Problem statement - Proposed system - Purpose of the Study(one sentence) - General objective (one) - Specific objectives(3-4) - Justification - Scope - Limitations - Significance of the Study - Operational Definition of Terms
3	LITERATURE REVIEW (chapter two)	- Introduction (to the chapter) - Related literature review(min 5, max 7) - Gaps/lacunas - Context Diagram /Conceptual framework - Chapter conclusion
4	Methodology (chapter three)	- Introduction (to the chapter) - Development methodology - Justification of methodology - Data collection (Optional) - Data analysis

		- Chapter Conclusion
5	System design (chapter four)	- Introduction - Requirements - Context level diagram - Input design (User interfaces) - Process design(use case diagrams, flow charts, Data flow diagrams etc) - Database design(use normalization to determine relationship between tables in the database) - Output design(design of expected reports) - Chapter conclusion
6	System testing and implementation (Chapter five)	- Introduction - Unit testing - Integration testing - System testing - Database testing - Implementation requirements - Coding tools - System home page or other relevant pages - Chapter conclusion
7	Conclusion and recommendations (Chapter six)	- Introduction - Conclusion - Recommendation - Future work - References - appendices
